

Raul E. Jiminian

Full Stack Engineer | Mobile | AI/ML | 0→1 Product Development

32-22 89th Street, NY 11369 • raul.e.jiminian@gmail.com • 347 239 9158

Engineering Highlights

- **Led 0→1 development of a production mobile social networking application**, shipping to the Apple App Store using SwiftUI and Firebase
- **Developed and integrated a custom computer vision pipeline** by training a convolutional neural network (CNN) using TensorFlow and Keras to recognize artwork from user-captured images.
- **Built AI-powered mobile features combining React Native and AWS services** (S3, Lambda, Rekognition) to enable scalable image recognition workflows within a museum companion application.
- **Mentored and instructed 200+ software engineering students** in full-stack development, system architecture, and software engineering best practices as an instructional lead at General Assembly.

Professional Experience

Founding Software Engineer, Find Your Vibe (FYV) | New York, NY March 2023 - Present
Founding engineer for a real-time, geo-location based social mobile application, leading 0→1 development from concept to production launch on the Apple App Store.

- Led **end-to-end development** of a **production mobile application** using SwiftUI and Firebase, taking the product from **initial architecture through App Store release** and onboarding **hundreds of users**.
- Implemented **scalable real-time systems** enabling **location-based chatrooms** tied to physical venues.
- Developed **90%+ of the codebase**, establishing **modular and reusable components** for long-term scalability.
- Built **backend infrastructure** using Firebase (Auth, Cloud Functions) to support **multi-user synchronization**.
- Partnered closely with **product stakeholders** in a **high-ownership team** to define features, user flows, and rapid iteration cycles.
- Implemented **geolocation-driven features** to connect users in shared physical spaces, driving core **product engagement**.

Instructional Lead, General Assembly | New York, NY January 2020 - Present
Teach full-stack software engineering and mentor students building production-level web applications. Design and deliver training for both aspiring engineers and enterprise teams, including applied AI, equipping developers to build, scale, and ship production-ready systems.

- **Instruct and mentor 200+ students** in full-stack software engineering, covering JavaScript, React, backend systems, and API design.
- **Design and deliver curriculum** focused on **scalable application architecture**, debugging, and engineering best practices.
- **Conduct code reviews and guide students** through building **production-level applications**.
- Redesigned curriculum and learning workflows, **increasing student engagement by 30%** and **reducing withdrawal rates by 45%**.
- **Led technical training for engineering interns** at M&T Bank, preparing cohorts for **production engineering environments**.
- **Delivered enterprise training programs** in software engineering and applied AI for organizations including **M&T Bank, The New York Times, New York Public Library, and Deloitte**.

Selected Engineering Projects

Artifact, AI-Powered Museum Companion

React Native | AWS | Computer Vision | Machine Learning

Designed and built a mobile application that enhances museum visits through AI-powered artwork recognition and interactive features.

- Built a **mobile application** enabling users to **scan and identify artwork in real time** using AI-powered image recognition
- Architected an **end-to-end computer vision pipeline** from camera capture → cloud upload → model inference → results returned to the application
- Developed and trained a **custom CNN using TensorFlow and Keras**, leveraging transfer learning for artwork classification
- Replaced **AWS Rekognition with a custom-trained model**, reducing infrastructure costs and improving control over the recognition pipeline
- Implemented **scalable serverless workflows** using AWS (S3, Lambda, DynamoDB) to process images and manage recognition results
- Designed **backend inference services** to handle image processing and deliver real-time responses to the mobile application

Previous Professional Experience

Senior Associate Director, UBS Investment Bank | New York, NY June 2009 - September 2016

Advised **enterprise technology clients** on strategic transactions across M&A and capital markets, partnering directly with executive leadership to drive high-impact financial and operational decisions.

- Advised **C-suite executives (CEO, CFO, CTO)** on **multi-million dollar transactions** across M&A and capital markets
- Led **client-facing discussions**, translating **complex financial and technical concepts** into actionable strategic decisions
- Built and presented **detailed financial models** (DCF, LBO, accretion/dilution) to support investment and acquisition strategies
- Collaborated **cross-functionally** with legal, technical, and executive stakeholders to drive **deal execution under tight timelines**
- Supported **high-impact transactions** within software, IT services, and communications sectors

Core Technologies

Languages: JavaScript (TypeScript), Python, Swift, Ruby

Frameworks: React, React Native, Node.js, Express, Django, Flask, SwiftUI

Cloud & Infrastructure: AWS (S3, Lambda, DynamoDB, API Gateway, Cognito), Firebase, Serverless architectures

Databases: PostgreSQL, MongoDB

Machine Learning & Data Science: TensorFlow, Keras, Scikit-learn, OpenCV

Developer Tools & Practices: Git, Jest, Jira, Agile

Education

Bachelor of Science - Finance, NYU Leonard N. Stern School of Business

June 2009

Dean's List | Sponsors for Educational Opportunity (SEO)
